

Microsoft Office 365

There's no such thing as out-of-office with productivity and collaboration tools designed to be used anywhere, anytime.

The modern workforce is no longer restricted to working at their desks. Instead employees are embracing the opportunity to stay connected to your business at all times, even when they're on-the-go.

56% of people

send their **first email** before they arrive in the office

73% of people

send their **last email** of the day after leaving the office

Getting the secure, reliable and flexible infrastructure you need to support this new way of working, without breaking your budget, requires an expert like Centrality.

We've combined Office 365 with our expert deployment and support services to offer a solution that gives you value from day one.

A solution that increases productivity with a range of collaborative and highly accessible tools available anywhere, anytime, across multiple devices. And will also reduce the cost of your IT by being available in the cloud on a pay as you use basis.

Not only do your teams get familiar 21st century productivity and collaboration tools, enterprise-level security safeguards that are trusted by some of the world's biggest businesses, but you also get a trusted partner you can rely on to deliver the best solution for your needs.

Microsoft Office 365 business benefits

Anywhere, anytime productivity and collaboration

24/7 access to email, instant messaging, conferencing, documents, contacts and calendars, wherever you are and on nearly any device. And, unlike some cloud based productivity solutions, Office 365 allows you to migrate seamlessly without losing file attributes or formats within your current documents.

The tools your employees *want* to use

A seamless experience as you access, view and edit your documents on-the-go using familiar Microsoft Office programmes across multiple devices.

Better communication 24/7 with enterprise-level, cloud-based email and calendars from Microsoft Outlook Online, as well as web conferencing and IM powered by Skype for Business.

Security measures you can trust

Your security and privacy matter, that's why Office 365 is well-protected by multiple layers of [ISO 27001](#) and [ISO 27018](#) accredited, industry-leading security safeguards. And with Microsoft's UK data-centres, there are no issues around data-sovereignty.

Savings from the moment you go-live

Office 365's monthly subscription reduces capital expenditure as soon as it goes live and can help cut operating costs by 30-50%. Using familiar Microsoft tools means company-wide integration is quicker, easier and ultimately less expensive.

Flexibility that covers every business

Centrality help you choose an Office 365 plan that perfectly suits your business, with the ability to seamlessly scale your solution with your growth. So, you're never left paying for something you aren't using or worrying about running out of room to expand.

Support from IT partners you can rely on

As well as dedicated support from a Senior Microsoft-Certified technician, you'll benefit from 24/7 phone support and guaranteed 99.95% uptime, as part of your SLA.

You'll notice reduced time and effort on routine IT management, thanks to automated security updates and back-end upgrades. We can even deploy a proof of concept environment, so you can test how Office 365 will work in your business before purchasing.

Centrality. With you all the way

Office 365 isn't a one-size-fits-all product, it's a wide range of different apps that can be fitted together in an almost limitless number of ways. Without the right advice it's easy to end up with a solution that might be perfectly functional, but not nearly as effective as it could be for your business – therefore not delivering the most value from your investment.

At Centrality, we take the time to find out exactly what your users need to be more productive in a way that makes a real difference to your business. Only then do we begin developing the perfect combination of Microsoft technology to work seamlessly with your existing IT systems, and deliver the right solution for *your* business.

And because we know that a successful IT solution isn't just about technology, our experts are there with you all the way, providing dedicated support and training to speed up adoption, and continuously improve your new solution.

All of this comes without the burden of a large upfront investment, just one simple monthly bill.

Contact Centrality

The enterprise IT market has numerous products and services that seemingly offer organisations easy solutions to complex problems - promising to help them save money and work more intelligently. The biggest challenge is often leveraging the right technologies, in the right combination to deliver maximum value for your business.
