

# Cloud Powered Desktop

Secure, Managed and Always up to date

## To succeed today, you need the right platform

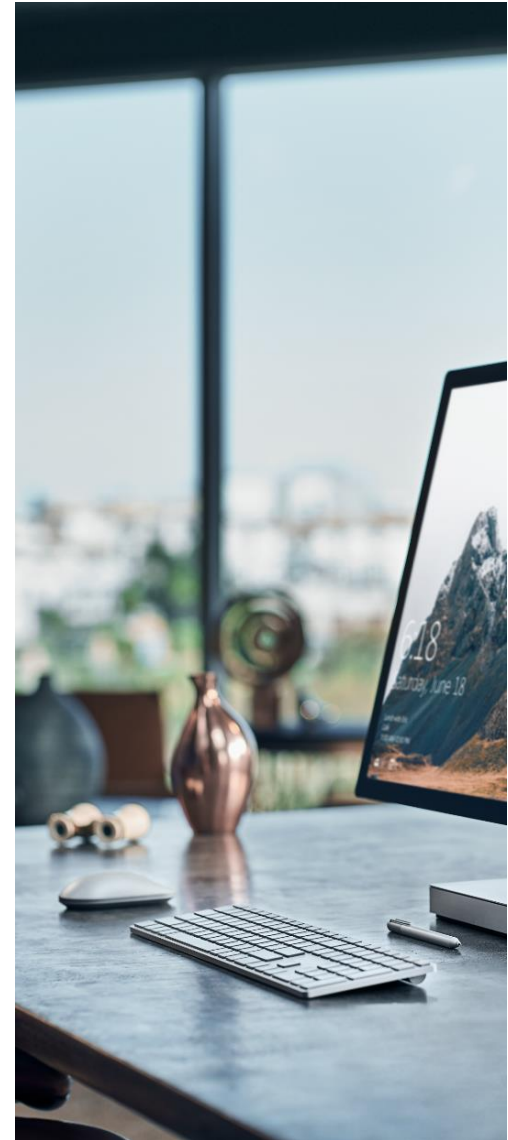

Marketplace and digital trends increasingly shape the way we work and do business. More and more employees are spending time away from their office than ever before. But whether you're on the road or in an office, you need workspaces that simplify collaboration with local and remote colleagues.

Centrality's Cloud Powered Desktop service provides a highly secure Windows 10 based experience on both new Surface devices and your existing hardware, providing you with accessible and consistent ways of working across your entire organisation.

Get started in days with no up-front costs  
and no infrastructure to deploy.

Established for over 20 years, Centrality brings a wealth of experience as well as industry best practice in an easy to deploy service. No longer do you need a big project to move to the "next version" of Windows, or deal with the twice-yearly major updates.

Speak to us to see just how easy it is to get a pre-hardened, highly productive Modern Workplace solution, out of the box, that is easy to deploy, is fully supported and is always up to date.

A secure, fully managed and supported Windows 10 experience, powered by Centrality & the Microsoft Cloud that is secure by design with Self-Service-Password-Reset and Multi-Factor authentication as standard.

### Comprehensive Protection

Windows 10 is the safest and most secure Windows ever and with Centrality's deployment of NCSC best practices along with added protection from Microsoft's Enterprise Mobility and Security suite you can ensure the best possible experience.

### Ensure Productivity

Gain productivity without compromise. Employees benefit from using familiar apps and a consistent experience across any device, whether existing or provided under this service. Best-in-class accessibility services are enabled by default to deliver value to all.

### Access anything, at anywhere, at any time

Get the familiar Office experience on any device and work with your files anywhere. Apps and files are always up to date, so you can stay focused on your work. Robust Internet content filtering provides another layer of protection, wherever you are.

### Managed, Updated and Supported 24x7

With monthly quality updates and bi-annual feature releases for both Windows and Office, let alone daily anti-malware update, it can be time consuming to keep your devices up to date. Centrality manage this on your behalf, 24x7 from our UK head office.

## How it works

We will work with you to understand your requirements in each of the 4 pillars below. The combined service is then provided for a fixed per user, per month price. \*

#### Device

Choose new devices from the Surface family

Or

Experience the cloud powered desktop on your existing devices
